

## **ENVIRONMENTAL POLICY**

**CRAMBO ALQUILER** with the aim of minimising the possible environmental impacts of its activities.

**"Installation, services and integration of audio-video and communications systems. Commercialisation and rental of audio, video and communications equipment, accessories and consumables".**

It wants to be actively involved, wherever possible, in the prevention of the negative environmental impacts that the company may generate in the course of its activities, starting from the moment it is aware of the work being carried out until the products leave our warehouses. For this purpose to be achievable, we will adopt the following criteria:

- The commitment to permanent compliance with the legal requirements and other requirements applicable to our activity will be our first and fundamental commitment.
- Crambo undertakes to carry out a periodic control to keep the Environmental Management System effective, establishing environmental objectives and programmes that can be reviewed annually for the continuous improvement of our environmental performance.
- We are committed to protecting the environment, including the prevention of pollution, and to properly manage the waste we generate in our activity, as well as to gradually minimise the quantity and nature of this waste.
- We will take the necessary measures to ensure that all members of our staff are aware of this policy and will have it at their disposal should they need it. It will also be disseminated to suppliers, customers and various collaborators.
